This Block diagram shows our real application using the ACKSYS HyperLan-Pack Wireless BackHaul.

Mountain system transmits data for 2 camera networks, Audio IP Codec, an antenna Control Data sent to the Ground system. All data is bi-directional, required Data rate for cameras is 10Mbps (MPEG4 720x480 20fps), audio IP Codec needs 300Kbps, Control Data needs 1Mbps.

With ACKSYS HyperLan-Pack, we get a data rate more than 30 Mbps ...

System Install on Ground
